PARKER A. DINGLE

Savannah, GA | parkerad2023@gmail.com | (912) 409-1256 | linkedin.com/in/parker-dingle | github.com/ParkerDingle

EDUCATION

Georgia Southern University Savannah, GA

B.S. in Computer Science, Minor in Management | Expected Graduation: May 2027 | GPA: 3.5
Relevant Coursework: Database Systems, Data Structures, Linear Algebra, Theoretical Foundations

TECHNICAL SKILLS

Languages: Python, SQL, Java, C++, C#
Data Science: Pandas, NumPy, Scikit-Learn, statistics and ML fundamentals, feature engineering, hyperparameter tuning (GridSearchCV), model evaluation metrics
Visualization: Matplotlib, Seaborn
Databases & Tools: MySQL Workbench, Flask, Git, VS Code, PyCharm, IntelliJ
Other: SCADA systems, field instrumentation and sensor data validation

PROJECTS

YouTube Trend Analysis | Python, Pandas, Matplotlib, Seaborn

- Analyzed a dataset of 6,000+ trending YouTube videos to identify the measurable drivers of reach and engagement across a large, noisy behavioral dataset.
- Cleaned and wrangled inconsistent real-world data (missing fields, mixed formats, duplicate records) and built reproducible subsets so findings could be regenerated rather than hand-assembled.
- Used Matplotlib and Seaborn to separate genuine signal from artifacts of how the data was collected, then translated the analysis into specific recommendations a non-technical decision-maker could act on.

Machine Learning Classifier | Python, Scikit-Learn, NumPy, Pandas

- Engineered an end-to-end ML pipeline: data cleaning, feature engineering, train/test splitting, scaling, hyperparameter tuning via GridSearchCV, evaluation metrics, and heat-map visualization.
- Focus was on building a defensible pipeline and evaluating the model honestly, rather than on the benchmark dataset used to exercise it.

Trading Bot Algorithm | Python, SQL, Flask, REST API

- Built an automated trading system running 24/7 against paper accounts, integrating a market data API, a SQL database, and Flask application logic.
- Developed a live web dashboard and automated Discord alerting to monitor a continuously running production-style pipeline and surface failures without manual polling.

EXPERIENCE

Southern Flow Alpharetta, GA
Controls Engineer Intern *May 2026 – August 2026*

- Built custom SCADA systems that continuously collect sensor and process data, and supported device configuration and communication testing between field hardware and the SCADA interface.
- Performed continuity and loop checks to validate signal integrity end to end, and troubleshot faults behind readings that appeared plausible but were incorrect: practical experience in not trusting a dataset until you know what produced it.

Tosa Coffee Company Savannah, GA
Shift Lead *September 2024 – Present*

- Direct day-to-day operations in a fast-paced customer-facing environment, mentoring baristas and resolving problems under time pressure.
- Streamlined workflows and improved team efficiency by optimizing task assignments.

ACTIVITIES AND LEADERSHIP

Tech Developers Association Savannah, GA
Secretary *January 2025 – Present*

- Coordinate cross-team communications, manage meeting records, and organize professional development workshops with fellow officers.

CERTIFICATIONS

Microsoft Front-End Coding; Microsoft Office Suite (Excel, PowerPoint, Word)
